Assessment Summary for:

Last name

First name

Middle name

Date of Birth (D/M/Y)

SECTION A

The above named individual does _____ / does not _____ meet DSM-IV-TR criteria for Mental Retardation.

OR

SECTION B

The above named individual does not meet DSM-IV-TR criteria for Mental Retardation, but the individual does meet CLBC eligibility criteria as defined in the Community Living Authority Regulation as amended effective January 31, 2010.

- i. A qualified specialist has assessed and diagnosed the individual in accordance with the DSM-IV-TR as having a Pervasive Developmental Disorder. A qualified specialist is either a psychologist or a psychological associate registered with the College of Psychologists of British Columbia, a Psychiatrist, or a Paediatrician.

Pervasive Developmental Disorder (PDD) has been diagnosed as (please check):

- Rett's Disorder
- Childhood Disintegrative Disorder
- Autistic Disorder
- Asperger's Disorder
- PDD-NOS

The diagnosis of PDD was made by:

Name of qualified specialist

Date of formal report or document stating diagnosis (D/M/Y)

and/or

- ii. A registered practitioner¹ and a medical practitioner have assessed and diagnosed the above named individual in accordance with current Canadian Guidelines² as having Fetal Alcohol Spectrum Disorder (FASD).

FASD has been diagnosed as (please check):

- FAS (with confirmed exposure)
- FAS (without confirmed exposure)
- Partial FAS (with confirmed exposure)
- ARND (with confirmed exposure)

The diagnosis of FASD was made by

Name of medical practitioner

Date of formal report or document stating diagnosis

Name of registered practitioner

Date of formal report or document stating diagnosis

AND

iii. The above named individual has been assessed by a qualifying practitioner as having significant limitations in adaptive functioning. Global Composite scores from one of the following measures of adaptive functioning that is at least 3 standard deviations below the mean.

Scales of Independent Behaviour Revised (interview format) (score) _____

Vineland Adaptive Behaviour Scales (interview format) (score) _____

Adaptive Behaviour Assessment System (interview format) (score) _____

Comments

I attest that this individual has significant limitations in adaptive functioning that are not primarily due to sensory deficits (e.g. impaired vision or hearing) mental health problems, environmental deprivation, physical health problems, cultural factors, ESL, or socio-economic factors.

I am a qualifying practitioner as defined in the Community Living Authority Act Regulation. A qualifying practitioner means either a psychologist or a psychological associate registered with the College of Psychologists of British Columbia or a psychologist certified by the British Columbia Association of School Psychologists.
